# Burton's *New Globe Type* *Barberry*

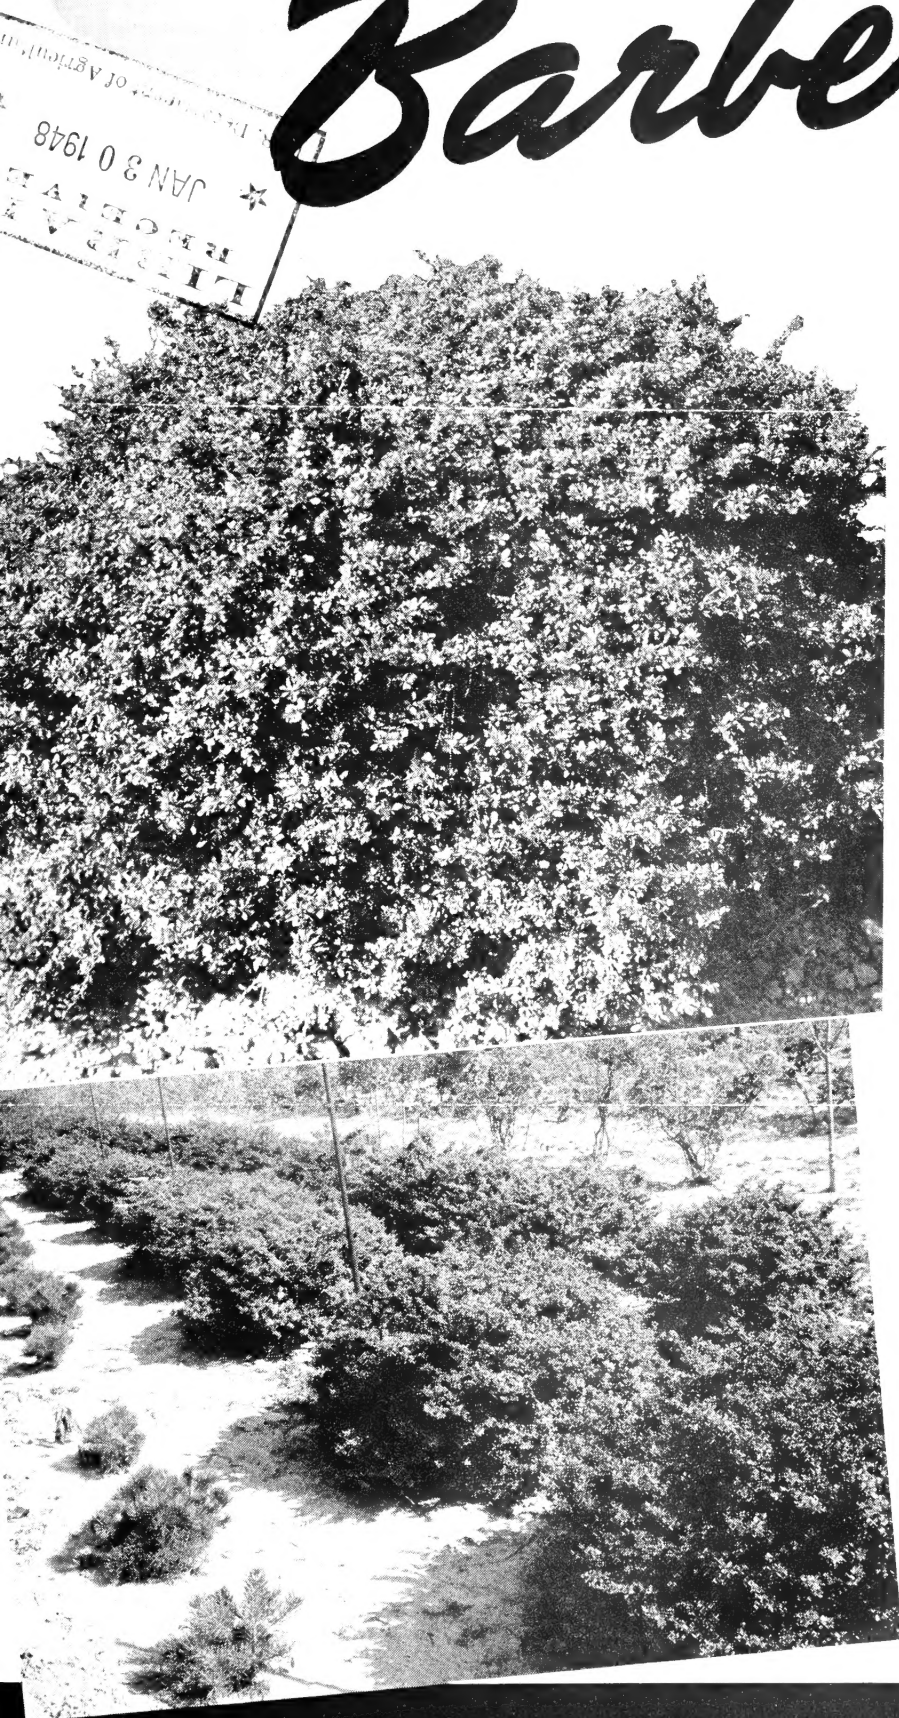

**...DOES NOT NEED  
SHEARING to make  
it Round and Compact**

This new globe type barberry is a dwarf type edging plant that will not outgrow its usefulness. It is a permanent dwarf, never exceeding 4 feet in height. Its short, stout twigs and abundance of leaves makes it an excellent plant for hedges. It remains round and compact without shearing—yet shears beautifully if desired.

If you are looking for something new and different for landscape work, you should have this new globe type barberry in your gardens now. Use the order blank on opposite side to assure your getting your plants for early planting.

This new globe type barberry gives excellent protection to exposed evergreen plantings—will not crowd or spoil the evergreens.

*Burton's*  
**HILLTOP NURSERIES**  
CASSTOWN, OHIO

Above shows the ordinary barberry with long, scraggly branches and uneven shape.

Above is an unsheared sample of Burton's new globe type barberry. Note how compact, round and full it is.

## A More Beautiful All-Purpose Barberry
